

BATTERY INSTALLATION

Use a cross-head screwdriver to turn the battery compartment screws anti-clockwise. Remove the battery compartment covers.

Insert 4 AA [LR06] batteries into the bubble blower with the polarities as shown. Insert 2 AAA [LR03] batteries into each wand with the polarities as shown.

Replace the battery compartment covers and tighten the screws gently.

IMPORTANT:

- Do not use rechargeable batteries
- Batteries must be removed and inserted under adult supervision
- Do not attempt to recharge non-rechargeable batteries
- Take special care to ensure batteries are inserted correctly, observing (+) and (-) marks on battery and product
- Remove exhausted batteries from product and dispose of properly
- Do not short-circuit the supply terminals
- Do not mix old (used) and new batteries or batteries of different types, e.g. alkaline, standard (carbon-zinc), rechargeable (e.g. NiMH), or batteries of a different make/brand
- Do not dispose of batteries in fire as they may explode or leak

The wheelie bin symbol indicates the product and batteries must not be disposed of in domestic waste as they contain substances damaging to the environment and health. Please use collection points or recycling facilities.

Bubble Buster

INSTRUCTIONS

AGE 4+ For 1-2 players

CONTENTS:

2 Bubble Buster Wands, Bubble Blower, Bubble Buster liquid

TO ENJOY BUBBLE BUSTER, PLEASE READ THESE IMPORTANT NOTES:

1. Before starting it helps to rub a little bubble liquid over the balls at the ends of the wands' antennas so it PINGS more easily.
2. Not all burst bubbles will make a PING noise. The slower and more deliberate the movement to prod and burst a bubble, the more likely it will PING.
3. The very best way to make a PING is to "catch" the bubble between the antennas, then twitch the wand to burst it.
4. If the wand makes a continuous noise, the head needs to be wiped clean of bubble liquid. The wands may also need a few minutes to dry thoroughly.

The contents are expressly designed for the purpose described and shown, neither should be placed in or near water, they are electronic and will not withstand repeated mistreatment.

WARNING: Residue from the blown bubbles can cause the surface below the blower to become slippery.

Getting Ready to Play

An adult should install the batteries - see the back page.

Take the white "eyes" panel off the front of the bubble blower [pic 1] and fill the bowl with bubble solution [pic 2].

Switch on each wand [pic 3]. When you burst your first magic pinging bubble the wand will make the first "ping" and the red light on the handle will come on to show you have enough battery power [pic 3].

Game Play

Press the button on the top of the bubble blower [pic 4] to start the bubbles blowing. When you want to switch off the blower press this button again.

The two players must start bursting bubbles as quickly as possible. The game is a race to see who can be the first to burst 20 magic pinging bubbles. Make sure both silver antennas touch the bubble when you burst it or the wand will not count it.

When you burst a magic pinging bubble the wand makes a "ping" noise. As you burst more magic pinging bubbles, the "pings" get higher in pitch.

Winning

When you burst the 20th magic pinging bubble the wand makes a chime with several notes to let you know that YOU are the winner! If both players' wands chime at the same time the game is a draw.

Starting a new Game

Switch both wands off and on again to start a new game.

If you don't pop any bubbles for three minutes, the wand will switch itself off, touch a magic pinging bubble to switch it on again.

Wand

If you get a repeating sound, switch off the wand. Clean the head and silver antennas with a damp cloth then dry it before switching on again.

Please dry the wand and antennas before putting them away.

Did you know that bubbles evaporate? So the earlier you touch them the better the chance of finding that magic PING noise.

Blower

If the blower is not blowing bubbles consistently, top up the fluid.

Do not stop the blower arms going round while it is switched on.

If the blower is used outside and there is a light wind, face the blower so it blows the same direction as the wind [pic 5].

Always pour the remaining bubble liquid back into the bottle after use. There is a spout on the bottom edge of the blower opening [pic 6] to help pour cleanly. Always wipe dry before putting away.

For best results place blower unit approx 800mm off ground level.

Safety recommendations for bubble solutions:

Use bubble solutions specifically designed for children. These products contain less surfactants, fragrances and other ingredients which may cause irritation to a child.

Do not allow your child to play with undiluted solutions. Undiluted solution is likely to have an increased irritation potential, particularly with a young child's eyes.

Swallowing large amounts of bubble solutions, particularly if undiluted, may cause vomiting and irritation to the mouth and throat.
